How about adding these Monoprice Premium Dual 5.25 Inch 2-Way Tower Speakers that only cost \$90/pair shipped http://www.monoprice.com/product?p_id=12209. It looks like they use the same mid drivers as the Monoprice Premium 10532 bookshelves but with a different tweeter (wonder if the rolloff issue is better?). With free shipping they're actually \$10 cheaper than the 10532's and are a decent height at 36". I'd love for you or one of the other budget speaker sites to test these.

Elac F5 is \$279/each: <http://www.amazon.com/ELAC-Debut-Tower-Speakers-Each/dp/B014GSEPY8>

Great reviews: <http://www.cnet.com/products/elac-debut-f5/>

Is this list still relevant? Are there updates to make?
