Need some opinions Wireless Go 2 vs Pro

I just recently bought the Pro (365) but came across being able to pick up the Wireless Go 2 with a charging case sealed for 150 here locally. I do like the 32 bit float as I'm a novice and don't want to clip my audio. Is it really worth the 215 price difference though??

Definitely Pro! It's the cheaper option. No need to mention the 32bit as you already mentioned it. I have both and if I had to buy one of them, it would definitely be the Pro option.

I have both the Go IIs (which I loved) and the Pros, (which I preordered sight unseen because I was so impressed with the Go IIs). The extras you get with the Pros are absolutely worth it. The Lavs, the magnetic mounts, the whole shebang. Plus they have a chunk more recording time available, and the 32bit is not to be underestimated. They'll last you a very long time.

Also to note - if you're ever looking for an upgrade, I have some Sanken Co's Ild mics which work very well with any of these and the combo has never let me down.
