[PA] DAC/Amps with mic input option (<\$150)

DAC - Desktop

Looking for a DAC/Amp combo to power my headphones. Used for music, but also online gaming, which means I need a mic in. I've been looking at the [Schiit Fulla](#); doesn't seem like it's a super common setup for DAC/Amps. Are there other options I should be considering?

Budget: \$150 USD (can be stretched if worthwhile)

Source: PC

Use: Home listening, gaming, music

Current Gear:

- KRK KNS-6400 (potentially looking to upgrade in the nearish future, as well)
External mic

Not a lot of options with mic in.

Thanks--what would be the benefit of jumping from the Fulla to the Hel? Obviously improved quality/features/power, but is that something I would be able to notice?

Any reason at all that I would choose the Astro Mixamp over the Fulla (which is cheaper)?

Honest question, why would you need your dac/amp to have a mic input? Why cant you connect direct to your PC?

Apple USB-C to 3.5 mm (has mic monitoring and out performs its size and price)

Syba Sonic

Schiit Hel

Mayflower Arc

And more...
