YanniCzer

applying thermal paste to ryzen 5 7600x

Miscellaneous

so [in this video](#) at 7:13-7:14, I don't see thermal paste on the bottom of the cooler nor do I see the paste on the cpu. This is my 2nd time ever building pc and i dont remember what I really did for the first time, so I'm wondering do i not have to put any thermal paste for my new build?

You do, yes. It'll function without paste but it will probably thermal throttle.

[Reply](#)**-UserRemoved-** • 2y ago •

I can't tell but I'm assuming there is paste on the bottom of the cooler, otherwise this build video is pretty flawed. Yes, you do need thermal paste. It should be included with your cooler.

is the pre applied one on the cooler good enough?

also, am i blind or does there actually not seem to be any paste on that cooler?

Copilot+PC

A new AI era begins

hp.com/AIPC

Some Copilot+ PC experiences require free updates. See aka.ms/copilotpluspc

The advertisement features the HP logo at the top, followed by the 'Copilot+PC' branding. Below this, the text 'A new AI era begins' is prominently displayed, along with the URL 'hp.com/AIPC'. At the bottom, there is a small image of a laptop screen showing a colorful, abstract AI-themed graphic. A disclaimer at the very bottom states: 'Some Copilot+ PC experiences require free updates. See aka.ms/copilotpluspc'. To the right of the text-based advertisement is a photograph of a dark-colored HP laptop, showing the HP logo on its lid.
