# Microsoft Activation Scripts (MAS)

Open-source Windows and Office activator featuring HWID, Ohook, KMS38, and Online KMS activation methods, along with advanced troubleshooting.

## Download / How to use it?

### Method 1 - PowerShell (Windows 8 and later) ❤️

1. Open PowerShell (Not CMD). To do that, right-click on the Windows start menu and select PowerShell or Terminal.
2. Copy and paste the code below and press enter

```
irm https://get.activated.win | iex
```

3. You will see the activation options. Choose (1) HWID for Windows activation. Choose (2) Ohook for Office activation.
4. That's all.

► More options

### Method 2 - Traditional (Windows 7 and later)

► [Click here for info](#)

#### Note

- The IRM command in PowerShell downloads a script from a specified URL, and the IEX command executes it.
- Always double-check the URL before executing the command and verify the source if manually downloading files.
- Be cautious, as some spread malware disguised as MAS by using different URLs in the IRM command.

To run the scripts in unattended mode, check [here](#).

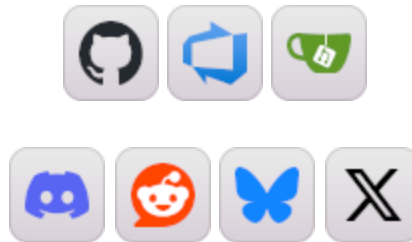

Latest Version: 2.9  
Release date: 20-Dec-2024
