Sudden No Service On Verizon Based Straight Talk? Possible Solution

Hey guys. I own and operate a computer/smartphone repair store and today we had a dozen Samsung phones come in that are on the Straight Talk network using Verizon towers. They all came in with a similar story about how the phone suddenly stopped making/receiving calls, no mobile data, no text messages. This apparently all began 2 days ago.

I initially tried various APN settings, but that had no effect. I then tried a network reset and that too had no effect. Just finished fixing 3 phones and about to start the 4th, so I figured I'd make a post to help anybody else with this.

Potential way to fix your phone:

Prerequisites:

1. Your phone is an UNLOCKED Samsung phone. If you aren't sure, check your model number. If it ends with U
you are good. This model 884V ends for models ending in 884, but I have not tested it. Follow at your risk.
