If you just bought it, return it lol. Say it didn't work with your computer or some shit.

one. It also depends on your use case. Give it a try, and if you don't like it for whatever reason, return it / change it for another one.

I have a 32" 720p TV, and it's nice. Yeah, it's a TV, not a monitor, so not sitting just in front of it in my desk, but for 32" you need some distance anyways if you want to keep everything within your field of view.
