4K Monitors: 165Hz w/ 2 ms response time vs 144Hz w/ 1 ms response

[Build Help](#)

Hi All,

Currently looking for a 4k Monitor for a build with a 3800 X3D w/ 4070 TI Super. Unsure which monitors to get and which specs to prioritize if Im going to be playing a wide range of competitive shooters along with RPG style coop games.

I was thinking between either this 32" Acer monitor which has 165Hz but 2 millisecond response time (400\$)

Or this 32" MSI curved monitor which has 144Hz with 1 millisecond response time (430\$)

Check reviews, monitor manufacturers claims on response times are a total BS.

Is a 9800X3D overkill to use it with a 4070 TI super for 1440p, 60+FPS gaming?

Curious question, any reason why some of you still settle on a 1080P display despite having a 1440P capable system?
