TMaster2345

7900xtx with 3* 8 pin pcie connectors.

[Build Help](#)

Hi all, I've been scrolling though reddit to find out how I should hook my GPU up, people seem to evenly swing different way and I'm confused now.

I have the 7900 xtx Sapphire Pulse which has 3* 8pin power connectors. Should I use a daisy chained PCIe cable for 2 slots and use a single PCIe cable for the remaining slot? Or, should I get 3 individual PCIe cables?

If anyone knows how to make a poll I'd be happy to let a majority vote decide.

2 cables with one daisy chain is fine.

CableMod_Matt • 2y ago •

What PSU make/model are you using? Three single cables is always preferred if you are able.

I have a nzxt 7n 650e which requires 1 8 pin and 1 4 pin for cpu...using 2 slots in my c1200 power supply. merc 310 7900 xtx requires 3 8 pin. so can I use 1 8 pin then the cable that comes with power supply 2 8 pin on 1 cable?

Thanks, I will fit the default Corsair cable (18pin pcie, 1daisy chain pcie) for the moment, I contacted your support team and I will get shorter custom cables built being a SFF build.

Is something like this not a better option than daisy chaining?

<https://eustore.cablemod.com/product/cablemod-rt-series-pro-modflex-sleeved-12vhpwr-pci-e-cable-for-asus-and-seasonic/>

What did you end up going with? I'm on the same boat with my 7900xtx. I have a MSI A1000G PCIe5 that came with only two 6+2 pigtailed PCIe cables. I hate the look of having the extra pigtail hanging unconnected. I wish the MSI came with a single 8pin since I only have the option to use 2 PCIe cables on the PCU

2 really is fine, I've got custom cables now but only got for aesthetics. Did not see a boost in performance when I hooked the individual cables up. If your annoyed with extra pigtail just use one daisy chain and buy a single pcie cable.

issue. Maybe the 12vhpwr cable mod could fix this?
