Error while loading shared libraries: libssl.so.1

I'm trying to speed test my 10gb nic but when I run iperf3 I get:

```
iperf3: error while loading shared libraries: libssl.so.1: cannot open shared object file:
```

I can see libssl.so and libssl.so.1.1 in /usr/lib64 but nothing for just libssl.so.1. Can I get iperf3 to use libssl.so.1.1 or do I have to do something else?

I had the same issue, jakebg313 posted a fix in the Unraid forum.

<https://forums.unraid.net/topic/35866-unraid-6-nerdpack-cli-tools-iftop-iotop-screen-kbd-etc/page/57/>

Everytime I restart the server I have to run the commands again.
