Has there been a good Star Trek video game?

I have always liked the idea of a rise through the ranks game but I don't know if that has been done successfully.

I am thinking more console/PC level rather than mobile gaming.

Star Trek Online is sort of "rise though the ranks", although really you're just a captain the entire time from Ensign to Vice Admiral (or whatever the highest rank is called).

Some great Star Trek games include Bridge Commander, Elite Force, DS9: The Fallen, Resurgence, Armada, 25th Anniversary (DOS), Judgment Rites and A Final Unity.

Also, the missions early on tend to have you in situations where you end up being "assisted" or have the cavalry show up to help out, where later on you end up doing a lot on your own or end up being the cavalry for someone else.

You also get access to different ships as you rank up. Pretty well done, imo and is FTP not only on PC but console as well, so you don't lose anything by trying it out!

I wish I could include Infinite in that list, but it's a buggy mess and the game got killed before it could start moving towards DLC.

So instead I'll say [Stellaris: New Horizons](#)

Star Trek 25th Anniversary is still the pinnacle of Trek games. Adventure based, a little ship combat, some minor action, and a good story. It still holds up.

I enjoyed Armada, Starfleet Command, and Elite Force too.

In my opinion, [Klingon Academy](#) is the best Star Trek game out there.

For me "Birth of the Federation" is the best game of all time. I absolutely love it and still play it to this day.
