Patch History

[Update 29.5](#) (2020-11-19)

- The mining drop rate of Thaumica has been doubled! We've also Reduced the chance of getting Namalon while Mining in the Cambion Drift so that the chance of getting Thaumica is significantly increased.
 - Both Necrathene and Thaumica were similarly rare, but Thaumic Distillate is used in a wider variety of Blueprints, so expect to see it appear more often from yellow mineral deposits.

[Update 29.0](#) (2020-08-25)
