Best wireless gaming mouse?

Question

Hi! I have a gaming laptop. It's Alienware and I want to minimize the use of cables as much as possible. I recently got a monitor to connect to my laptop but I can't use the monitor since I have all these cables going and the mouse I used it also wired so it's so much clutter. I want to know which is the best wireless gaming mouse I can get and something that's not overly priced. Can anyone help?

What's your definition of overpriced? There are lots of great options, but price means different things to everybody.

My favorite mouse I have is the Steelseries Aerox 5 Wireless. It normally costs \$140, but it's currently 28% off on both Amazon and Steelseries' website.

You will not get RTX 4090 performance from an RTX 5070 in gaming in general. nVidia tried that tactic with the RTX 4070 and the RTX 3090 and the 3090 still wins today.
