Convergence Mod crash

Misc. Mod

Hello,I am experiencing an issue with the Convergence Mod for Elden Ring. When I launch the game and reach the main menu, I attempt to start a new game, but the game crashes and closes unexpectedly.To diagnose the problem, I used Process Monitor for two hours to capture the relevant logs. The analysis indicated that there is a missing file, but the specified path does not exist. My game is the latest version on Steam, so I suspect that the error might be related to some unusual DRM or compatibility issue with the mod.Here are the steps I have already taken to troubleshoot the issue:

1. Verified the integrity of game files via Steam.
2. Reinstalled the Convergence Mod following the provided instructions.
3. Disabled all other mods to rule out conflicts.
4. Ensured that both the game and the mod are up to date.
5. Consulted community forums for similar issues but found no definitive solution.

There was a patch earlier this day so many of the mods may have been affected. I had trouble with seamless coop as well. For now I suggest just wait till the mod updates and see if it works out

Kinda a curious Lore question are the bosses waiting for tarnished or is the Tarnished running into the boss and it's just a coincidence that they encounter each other??
