How do you play the Downfall mod?

QUESTION/HELP

I've subscribed to all the required workshop mods, so what do I do next? Google and Discord didn't give me anything.

When you launch StS from your steam library (not from a shortcut) a window will pop up. Select "Play With Mods" and click Play. Alternatively, you can navigate to the game files for StS and run mts-launcher.jar.

Next, a window titled "ModTheSpire" will open up. You should see all your subscribed mods in a list on the left side. Make sure that the checkboxes next to Downfall and all of its requirements are checked. Then click play in the bottom left.

If all has worked, the game should launch after a bit of loading.

From my experience, you just get the base mods and Downfall, run StS on Steam with mods (you should be prompted to either run the base game or with mods) and include Downfall into the list

Slay the Spire: Downfall - this MOD is basically a complete expansion for the game, switch sides and defend the heart from the four vanilla heroes.
