Dragomar

Shortcuts - Keyboard

[Game Help](#)

Having problems assigning shortcuts to my pouch - especially since the default setting is the arrowkeys and I have a mini/compact keyboard. (And the shortcut dont work when holding fn key as it should). Went to settings to change torrents whistle to tab, but there was no option to change the pouch keys.

Anyone have any solutions?

Instantly add a blur effect with Lens Blur in Adobe Lightroom. One-tap presets make it easy to edit your photos and focus on what matters most.

What I did for the arrow command armament key bindings, I simply changed them to 1,2,3,4 (e.g. changing magic, flask, left-hand right-hand) while maintaining the default mouse switch commands. If you don't have a number layer either, then maybe assign unused-keys that u can easily press and is logical for the different directions. For me, this means that I can access the pouch commands with E+1/2/3/4 and is pretty fast.

Good one! I will try that, 'cause taking my hand off the mouse mid-action sucks.

YSK: To move your cursor to a specific position on your phone, you can (for Android) swipe on your spacebar or (for iOS) long-press the spacebar and move without lifting your thumb.
