Help setting up a router with sim card

Hi, I have a D-LinkDWR-921 c3 and I want to use the lte modem in it, the wiki does have a guide for setting that up but i run the commands and still get no network access. Any help would be appreciated

I have set up that router, currently using the "Play" service provider in Poland, but it also worked seamlessly with other providers in the past.

Please provide answers to the following:

1. Which guide did you follow?
2. Are you using the QMI mode for the modem?
3. Can you provide the output of `uci export` (removing any passwords you might have in there)?

okay, nevermind i got it to connect to a dns server

 1   Reply ...**odhiambo0** • 2y ago

What commands and what is the output of those commands?

  1   Reply ...**Sikora77** OP • 2y ago

```
uci set network.wwan=interface
uci set network.wwan.proto='qmi'
uci set network.wwan.device='/dev/cdc-wdm0'
uci set network.wwan.apn='YOUR_APN_HERE'
uci commit network

uci set network.wwan.autoconnect='1'
uci set network.wwan.delay='5'
uci commit network

uci set firewall.@zone[1].network='wan wan6 wwan'
uci commit firewall

ifup wwan

opkg update && opkg install luci-proto-qmi

reboot
```

there is no output and the wwan interface starts and crashes and restarts in a loop
