RBJesus

4090 ASUS TUF OC (+ 1900MHz on the memory + 200 on the core, running at 60-63c)

Using MSI Afterburner testing on Heaven, I am not getting any artifact with the settings in the title. This seems super high. Am I missing something? Registering 500-600fps.

1500 plus Double check your fps Drop it to 1k and see if your fps increases or decreases High memory may not crash but just dial back the speed

[Top 1% Commenter](#)

Most 4090 can push the memory clock to +1500 Mhz and core clock to +200 Mhz of higher, so this isn't that uncommon. If you're willing to increase the voltage to 100% or 1.1v, you can likely squeeze out more on the core clock.

2

[Reply](#)RBJesus **OP** • 2y ago

Yeah, I upped the power to 133%. Can't seem to get 1.1v though. Only able to push to 1.05v

[Skip to main content](#)[Log In](#)**RBJesus** OP • 2y ago

I was trying to find this one, it kept trying to charge me like \$34.99 to buy.

Do you guys run your TUF OC 4090 Overclocked all the time? For example +1500 on the memory all the time when gaming?

↑ 1 ↓ [Reply](#) ...

**MagazineSpare1365** • 27d ago

What was your score I only get 531fps average on heaven benchmarks with my 4090 and 7800x3d

↑ 1 ↓ [Reply](#) ...

**superx89** • 2y ago

No it's good.

↑ 1 ↓ [Reply](#) ...

**Hammercannon** • 2y ago

I can run mine around that for bench marking. I put the strix bios on it, and can do +110 core +2000 mem. With tuf bios it was +150ish core +2000 mem.

**SmichiW** • 2y ago

good temps but what rpm are your fans running?

⊖ ↑ 1 ↓ [Reply](#) ...

**RBJesus** OP • 2y ago

I'll have to go back and check. I had fans at 75%.

It's not ECC memory on the 4090 unless you enable it in the NVCP.

RBJesus [OP](#) • 2y ago

Will do. I appreciate the tip.

2 [Reply](#) ...

yzonker • 2y ago

Run the Port Royal stress test and see if that OC holds up. Heaven is too light.

1 [Reply](#) ...

swagapandaa • 2y ago

weird. i can hold 2000 stable but the core doesn't go over 190 even when i turn the voltage to 100%

1 [Reply](#) ...

cleverestx • 2y ago

When you say +XXXX on memory and core you mean you are adding that amount on top of the default existing values, correct?

1 [Reply](#) ...

RBJesus [OP](#) • 2y ago

Yeah
