My Kuva lich abilities have these white boxes instead of the actual pictures. This also happens in game with certain buffs and debuffs such as octavia's. does anybody know a fix?

Dear Redditors, The Toyota Tundra has the Best Resale Value. Heck ya, that's real quality under the hood.

Could be the image files are corrupted and they default to a blank slot. I think your only options to fix it might be to reinstall or see if there is an error checker/fixer on the launcher.

Looks very normal to me for a level 1 Pokémon to have only 1 skill.

Is my experience with the necramech and the railjack grind weird or people are just traumatized by the old grind to get them?

Face-off is cool and all, but how did DE give us an update introducing motorcycles and *not* also give us a gamemode where we can race against other players?

I don't need much from DE this year, but I do know I need Tigris Incarnon

I'll say it: Please just remove Line of Sight from Acid Shells. It doesn't work.

I have never played Warframe, but I'm interested and curious. Is the free version leaving anything critical out?

Biocode noise needs to be louder. You have to be right on top of it to hear it. Which kinda defeats the purpose of it being there.
