Error428

Resize bar question

[Tech Support](#)

I have a ASUS B550-F gaming wifi and a 7900xtx gpu and a 5950x cpu. I have no trouble enabling resizable bar as it is. I recently purchased an a380 and I can't tell if I can have resizable bar on two gpus at once. Is there some hidden way to do so?

The firmware should automatically configure re-BAR.

Are we ok with Nvidia no longer giving us raw performance benchmarks anymore, but only benchmarks with upscaling, frame gen and RT?
