Crazy-Counter6422

7900 XTX getting around 24500 score in Timespy?

Help (GPU)

Hi,

I got around 24500 score in Timespy. When I look from the internet thats around 7900 XT numbers? XTX should be atleast over 25000?

What experience do other 7900 XTX owners have? Im using 7800x3d with it.

Ok this is the same like I have it configured, so its not that. I enabled EXPO and SAM. Lets see how much those affect.

If your PSU ist too weak, you would have crashes, but not a lower score. What are your GPU & GPU Hotspot Temps? *edit* you may use HW Info 64 and check the max Value column After 2-3 Timespy runs

I've been told that I was basically an idiot for going on the 5700X3D upgrade from my 3700x and that it it's pointless for doing such upgrades
