NVIDIA RTX 5080 & 5090 - Leaked Prices - ASUS + GIGABYTE + PNY - MSRP Models!

News/Review

r/invidia • 5 days ago

NVIDIA RTX 5080 & 5090 - Leaked Prices - ASUS + GIGABYTE + PNY - MSRP Models!

I'm creating a new post since I have the prices for both the RTX 5080 + 5090 for ASUS + GIGABYTE + PNY. **This has been verified with this subs mods.**

These prices are going to be the real prices. See my older post for MSI prices!

We finally get to see MSRP besides Nvidia's FE!

Location: USA - Major Retailer

Prices: RTX 5080

GIGABYTE Windforce OC SFF (Black) - \$999.99

PNY OC (Black) - \$999.99

Which brand is usually the best for deshrouding? Msi?

⊖ ↑ 3 ↓ [Reply](#) ...

**MattTVI** • 5d ago

depends on what you want to do post deshroud.

I know that MSI ventus fans screw into the cooling tower, so you can typically find a ~\$25 mod on ETSY that let's you screw 3 brackets into the cooling tower and then you can put 2x 120mm fans on that (these mods usually come with the fan adapters as well).

From what I can tell, a lot of MSI air cooled boards seem to have those screws, I think Gigabyte does as well, if you do a quick google for 4080 deshrouds of gigabyte and MSI cards, there are a few examples, and you can see how it works on ETSY.

And if you have a 3d printer, you can measure and build your own brackets for it yourself.

edit: and looking at the images on MSI and Gigabyte websites of their 5080s, it looks like they have the same setup as the 4080s. make sure to confirm though for the specific card you want to get.
