Best modem or router I can use? Besides the one they provide.

Just looking for something that would be better than the one they provide. I'll be living in a small apartment.

I'm just going with the one they provide, I figured their own equipment would be optimal. I'm mostly gaming and streaming.. I move in next week I'll give you an update

I'd recommend buying your own to save \$10-\$15 a month:
