Auto-search priority for number of peers

Hello I recently installed sonarr and while the app works great and saves me a lot of time I keep having to remove slow/idle torrents and do a manual search to get better ones and I always pick the ones with the most peers. Is there any way to force sonarr to do so as well?

Up the minimum number of seeders in your specific indexers settings until you reach an equilibrium. I think it defaults to 1, try 2 for awhile and see how that feels. :)
