funkytorrents.com (Be careful almost all uploaded softwares have malware)

UPDATE: Thanks to me all the software torrents have been removed from <https://funkytorrents.com/> since they all had a password stealing malware in them.

Hello everyone. [Funkytorrents.com](https://funkytorrents.com/) has been online since quite sometime now. The first post that I read about it is dated 2007. So a few years back I joined it for music.

Their uploading bot was quite good at genres & I used to frequently download my R&B music from there until one day the bot stopped posting. I don't know the story behind it although I wrote to the mods there but never got a proper reply.

Fast forward to 2024. A few days back I visited it again and saw that they have also started uploading softwares. Some of the uploaded software torrents were quite good so I downloaded a few. When I tried to install the latest Winrar I got a notification that it contains password stealing trojan. So I checked all the softwares downloaded from

I mean, downloading free 7zip from torrents??

DriverBooster? what?

WinRAR has rarreg available on the net, old as hell patchers still works, even Scene releases in APPS section - last winrar was almost 9 months ago, even Winrar is literally <https://janbakker.tech/wp-content/uploads/2021/11/image-1.png> on free version for years since, I don't remember, 99? 2000...

For Apps I just use scene releases. So - are **scene** releases there on funkytorrents? lolwtf

Probably compromised users. This has been happening on MySpleen too. Update your passwords and use 2FA if available.

Hey, it's not malware if it's advertised.

Why are you downloading 7zip and winrar from a torrent site? Why are you downloading Driver Booster (a pointless scam) at all??? What a bizarre thing to do.

Do the torrent descriptions mention how to configure the malware? Maybe the idea is *you* distribute them to *your* targets and can steal their passwords?

In any case, if you still need 7zip... go here: <https://7-zip.org/download.html>

You're downloading free software (7zip) and actual commercially available scamware (Driver Booster) from torrent sites and complaining that the pirated versions have malware?

The fuckity fuck is wrong with you, man?
