Any recommendations for a budget 10-12 bay, hot-swap case?

[Question/Advice](#)

I'm contemplating doing a rebuild of my plex server and would like to simplify my storage solution. Any recommendations for a case that includes a hot-swap backplane for 10-12 HDDs? It can be big and ugly but I'd like to keep it under \$200 if possible. Also I'll need an internal SATA expansion card too so a recommendation there would be appreciated (6 port).

Current hardware:

- Ryzen 5 1600
- MSI X470 Gaming Plus Max (6x SATA ports)
- 32GB DDR4-3200
- GTX 1050 ti
- SATA: 8x 4TB, 1x 256GB SSD (cache drive)
