Startech.com rack build quality

[Discussion](#)

I have bought a 26U rack a while ago and before I could even hang it on the wall, the door hinge came undone. I dismissed it as a one-off occurrence, glued it back and didn't think twice about it.

Have you looked at Shipping damage when you got it ? And have you ask them about support or replacement parts ?

quespul • 4y ago

This, get in touch with them, they will help you all the way, had a 42u damaged as well and they sent replacement parts down to Mexico at no cost, which included a door latch and an inner rail just like the one you posted and a big box of bolts since we were missing like 8 or 9 from shipping from amazon.

I think this is all happened during assembly. There were no shipping damage that I could see. The rack was bolted onto the pallet, with nice padding and sturdy box that had no visible damage to it. But I will try to reach to them and see what they say. A bit disappointed though...

Their 12U open frame adjustable depth rack is a beast.

We had one 4-post rack that was missing parts, but the other StarTech cabinets were great. It's been my experience that buying anything from [Amazon.com](https://www.amazon.com) is a hit-and-miss. Too many repacked used items marketed as "New".
