WireGuard Config?

[HELP](#)

Hello PIA,

Any movement on the ability to generate/download a WireGuard configuration file? I run an Unraid server that takes WireGuard configuration files, so looking how to create those files from PIA.

Thanks!

It would seem that PIA have no plans to answer yet again, terrible service from PIA.

Its allegedly been high on their priority list for 5 years, they are a joke

No wonder customers are choosing an alternative VPN supplier who actually care about their customers and provide support for wireguard config files. I certainly will be....

If you don't have a Linux system available that can run these, I have no idea.

Thank you. I don't know much about Linux, but I can run it in a VM. Any chance you could describe how to do this in "baby steps"?

Thanks for your time.

You can download the PIA script to connect to their vpn since .ovpn do not work properly with openvpn.

The script works well but is a bit long because of different sub menu you have to pass through.

Anyway it is not too difficult to create your own script to connect to wireguard without all those options... yiu can make something really simple to allways connect to the same point, or can make something a bit more elaborate if you need.

example of the info derived:

```
[Interface]
Address = 10.18.137.76/32
PrivateKey = sM-----aYL1XszhzjD0HLMmAwL+9loYBMa/VxhT08k0=
[Peer]
Endpoint = 179.61.240.83:1337
PublicKey = no-----lJw0UtJ27Jm7HqLEzRaqL8ULRNnsRRlIccms=
PersistentKeepalive = 25
AllowedIPs = 0.0.0.0/1,128.0.0.0/1
```

 I used this info originally when PIA first offered wireguard, and it worked.
