Share subnet with other user

Help Needed

Dear community,

I have a node that is advertising a subnet. I can access it without any problem, but the user I shared the node with can't. Is there a special configuration I need to set? Or is not possible to do that?

Thanks in advance.

Hey DallasBelt
I'm trying the same thing to add another user to share my Subnet. Were you able to get it working?

DallasBelt OP • 1y ago

Yes, I did. Although, it was not a straightforward process. I remember that I had to open the shared link in my wife's phone, then I had to choose my Tailnet to login and finally the shared devices appeared in the app. I hope that's what's supposed to do, I don't remember exactly...

I joined a different Account to my Tailnet, but it just won't find any devices in this Subnet.

I have some more Information in this Post I made:
https://www.reddit.com/r/Tailscale/s/PesFMWkRyl

Thank you for your help in advance.
