Anyone have a list of the fastest servers that support port forwarding?

I've been doing some testing, I was stuck on about 8mbps downloading, got all the way up to 80 (torrenting via deluge). I'm on fiber gigabit, I'm assuming I'm at the top of my speeds, just trying to see if there is any better than what I'm getting. Right now using the Czech Republic one. Thanks!

Hello [u/conelpancake](#)

Since you're connected to a gigabit connection, you should be able to achieve better speeds. Try referencing the following news article for different ways to increase your speed while connected to the VPN client:

<https://www.privateinternetaccess.com/helpdesk/news/posts/improving-speed-combating-latency>

Same, barely getting over 5mbps on any server now. Can see my Saturday morning being spent doing trial and error trying to find a decent 'next generation' server!

This whole switch has been a joke. Terrible comms and now terrible speeds.
