FARSUPERSLIME

VLAN for VPN traffic

Im trying to create a vlan on openwrt that only goes through my vpn of choice (Windscribe) but I am not sure how to go about this, I believe I have the creation of vlans correct but I don't know how to make traffic on this vlan pass through the vpn, any help would be appreciated.

Have you checked out VPN policy routing? <https://docs.openwrt.melmac.net/vpn-policy-routing/>

Is this setup actually possible? Modem --> Unmanaged Network Switch --> One vpn-openwrt router, one normal-isp-router, where each is connected to the switch
