How to set up a no internet access VLAN for IP Cameras

This is my setup currently: [network diagram](#)

Hardware:

- Server is a [Asrock N100DC-ITX](#) with 8GB RAM and a Gigabit Intel NIC in the PCIe slot
- Switch is a [TP-Link TL-SG1016PE](#)
- Camera is a [Hikvision DS-IPC-T14HV3-LA](#)

Software:

I'm running Ubuntu 22.04.3 on the server with Frigate running on a docker container.

My objective is to make sure the camera cannot access the internet.

You appear to be using the same /24 network across both VLANs? If so, the Frigate server isn't going to know which NIC is on which VLAN.

Change the addresses in VLAN2 to 192.168.2.x/24 and try again.

I never saw the benefit of these network maps previously. Now that even my modest setup is growing in complexity, I really get it now. It's very useful to help with troubleshooting.
