## Help Configuring DDNS with CloudFlare

[SOLVED]

See [u/mazixoom](#) comment and his settings below - this is what worked for me!

---

Wondering if anyone can help me surmount this error? I'm trying to engage the DDNS service to update my IP on CloudFlare.

Seems like the main problem is a lack of https in libcurl, but I really don't want to have to rebuild the whole image just for this. Any thoughts about what I might be doing wrong?

Can you modify to use:

```
curl -k
```

That ignores ssl errors.

Hmm, that curl command is being issued by whatever the ddns-scripts-cloudflare package comes with.

I could break into that package and change it... Will do this when I get home and see if it solves this problem. Thanks!

Already installed, sadly :(

 1   Reply ... 3 more replies**user01401** • 2y ago

That is a known issue w/ libcurl and I read on the forums that a patch is being pushed out

I was getting curl error 132. Have all the same packages installed, etc. DDNS with cloud flare still not working.

  1   Reply ...**[deleted] OP** • 2y agoCheck out the comments from [u/mazixoom](#) and see if you can replicate - his settings worked for me. Key was that @ symbol 1   Reply ...
