Screen rotation won't work anymore after factory reset

QUESTION

Hello everyone. As the title says my Legion Go's screen rotation won't work anymore after I did a factory reset. As soon as it rebooted to the Windows 11 configuration wizard the screen was vertical (which is weird) and now to keep it horizontal I have to set it in the display settings, keeping it locked, because if I restart it it will go vertical again. Anybody knows how to fix this problem? Thanks in advance.

In order to correct the portrait screen's default orientation you need to set it to Landscape Flipped in Windows. You should only need to do this once per screen (including the built in screen). If you installed a clean version of Windows, you'll probably need to install and update the Lenovo software (space) as well.
