An IBM Guide to AI Agents: Beyond the Buzz

Hey, Reddit! We know there's a lot of curiosity (and confusion) around how autonomous AI agents can change the way we work. We pulled real questions from Redditors to break down the most important concepts. No hype, just the facts. ELI5: What are AI agents? AI agents are software…

macOS 15 VM wont allow me to update my apple account settings

I got a working macOS 15 vm running, i upgraded from a monterey vm but no that i have upgraded, it wont allow me to update the settings, i press the continue button and it loads for maybe 5 seconds then quits and doesn't do anything at all. Along with that i cant just sign into iMessage either, it allows me to sign in for about 10 seconds…

Mac os on virtual machine

Hi guys So I am tempted to try and install the latest mac os on windows host virtual machine. Is there any hardware specifications for the mac os to run properly. The pc I am using currently has a 2nd gen intel i5 core processor and I have like 16gb of ram inside the pc. I am new to the hackintosh game, I have only watched the…
