Confused about AnimeTosho + AniDB integration.

There isn't much information about this. Tosho requires AniDB, I get that - but how do I set that up? Do I need an anidb client program running locally?

I did not find any key after creation, where the key should be found? Sorry if this is a really dumb question

There is no key, just the name you gave and the version you gave.

Hi! Both Anime Tosho and its mirror have been down for a couple of hours now, even if both worked fine. Can't find any info of how long or why...
