LG Gram Pro 16 2024 OR M3 Macbook Pro 16

I have these 2 options. I don't game. I like to have a crazy amount of browser tabs open. Battery life is extremely important to me and I hate throttling. I can see myself using some CPU and memory intensive professional software for engineering in the future. Longevity and futureproofing is EXTREMELY important for me. I want it to last at least 5 years. My current dell XPS is a POS with 2 hours of battery life and broken trackpad. I mostly store pdf files like textbooks and MS Office documents and coding programs on my laptop.

LG Gram Pro - \$1800 - 32 GB Ram, 1 TB SSD, 16 inch, 155h, RTX 3050, OLED, 120 Hz.

Macbook Pro - \$2429 - 36 GB Ram, 512 GB SSD, 16 inch, 12 core CPU 18 core GPU, Mini-LED, 120 Hz.

What's best for me?

Mine has 2 fans & I've not had any overheating issues at all. Try one out--buy it directly from LG--they have a 30 return if you buy directly from them.

Good luck with whatever you end up buying.

BTW, here's a review of the Gram I have from Lisa at Mobile Tech Review:

My best friend asked for a recommendation so he can finally move on from his GTX1050 laptop. At ~20 mil, is this an okay of a list?
