Mickey_Beast

Failed to start tailscaled.service

Help Needed

UPDATE: I've fixed the issue. After spending too much time on google with no working solutions I finally gave up and just rolled back to a backup. I then updated my Navidrome and rebooted my LXC and then updated Tailscale. Now it works again.

So I'm facing this issue that I can't start Tailscale on my Proxmox LXC.

When I run the command tailscale up I get this error:

```
failed to connect to local tailscaled; it doesn't appear to be running (sudo systemctl start tailscaled ?)
```

Then if I run the command:

```
tailscale up --advertise-routes=10.10.10.0/24
```

What LXC image are you running?

What method are you using to install tailscale?

from tteck.

It's been running smooth until today. I updated Navidrome to the latest version and now I can't get Tailscale to work.

In the future, install tailscale via the helper scripts for Proxmox.

Mickey_Beast OP • 4mo ago

That's what I did. But that didn't fix the issue.
