BLBrick

Failed to connect to local tailscaled

[Help Needed](#)

Hello

I am *brand* new to linux and tailscale and doing this sort of stuff in general, so please explain any answers to me as if I were a [golden retriever](#) ...thanks!

I am running ubuntu 20.04 on windows 10. I downloaded it from the microsoft store (<https://apps.microsoft.com/detail/9pdxgncfsczv?rtc=1&hl=en-us&gl=US>). I then installed tailscale (or tried to) following this page (`curl -fsSL https://tailscale.com/install.sh | sh`) (tried both the manual and automated way). When I tried the `sudo tailscale up` I got: failed to connect to local tailscaled; it doesn't appear to be running (`sudo systemctl start tailscaled ?`)

Now for what I have tried.

You're not just running on linux, you're adding a complication of Windows Subsystem for Linux , which is an advanced install topic according to <https://tailscale.com/kb/1295/install-windows-wsl2> .
