How to setup a Linux VM on Unraid

Is there a guide anywhere?

I tried installing Linux Mint but if I select the first option from the installation Iso it just leads to a black screen, and compatibility mode also freezes on during boot. It hangs on a message regarding vga.

Is there a step I'm missing? I tried both the Linux and Ubuntu presets (mint is Ubuntu based)

Is there a guide anywhere? I can't find any or at least a modern one.

spaceinvaderone has a video on setting up debian as a vpn router. https://www.youtube.com/watch?v=J_cRe_c3Mc

The first part of it focuses on basic linux setup and should work for you.
