## Carlinkit 4.0 or 5.0?

Hi guys!

I bought a Carlinkit through AliExpress that shows images of 5.0, but I noticed that the model can be the 4.0 because the 5.0 didn't have stock. It's worth to return it and buy a 5.0?

It depends, if you're using Apple Carplay, than no need, it's going to be the same. If on the other hand you're using Android Auto, you should definitely get it replaced, since the 5.0 does nativ Android Auto, while the 4.0 emulates Android Auto through a Carplay connection, which in my experience caused dropped phone calls, weird display aspect ratio and scaling, and more bugs.
