Slippy_Flipper

Please dear god help HOW DO I STOP THE SERVER?

Made a server want to save whilst stopping but I cannot type into the command prompt. So how do I stop this????
Also, what should I run things like past logs with so that I can read them and there not gibberish?

Control + C (^C) or /stop in the shell running the command.

the first time you run a server you do not have access to the command line.

press CTRL+C to stop the server. When you boot it up again you will have access to the command line. Not sure why it does this. Hope this helped.
