found on disk, but not for current kernel; are you in middle of a system update and haven't rebooted? found:  
raspberrypi-kernel: /lib/modules/4.19.95-rt38-v7/kernel/d

I did in my mess of trying to make this work run an update

```
sudo rpi-update
```

My guess is this broke it.

I had not seen this before - Last few times it worked with the one liner - Thanks for pointing it out!
