Is pivpn still safe?

Is it pivpn still save after that it has ended the support for it? How long do you think that it is gonna be save to use?

Yes, 100%. Pivpn configures wireguard for you, it doesn't run the protocol. If there is ever a security issue with wireguard updating your system will get you the patches to resolve it. The issue with it not being supported too much deep into the future is that one day it just might not work anymore. This isn't the same as wireguard itself no longer being supported.
