Addic7ed AuthenticationError -- cookies no valid

Is there any way to use Addic7ed with cookies and not have them expire or become invalid? Or do you need a Captcha service or premium account of some sort?

Just use Gestdown als provider, uses addic7ed, but no username / password needed.

Safest way is to use anti-captcha.com. Some users have success with cookie but if you use cookie, don't specify username and password.

What providers do you use? None of my providers works due to various errors (log below)

When using Subzero for subtitles, all my subs have ads placed in them (from addic7ed I believe). Is there an easy fix for this, or does everyone just ignore it and deal?
