Enabling Multicast Routing

I installed and created some routes with smcroute, but when I checked the system log I noticed:

daemon.err smcroute[24247]: Kernel does not support multicast routing.

Is there an opkg I need to install or something?

Strange.. I'd have thought 18.0.1 kernel was built with it enabled, it is by default in the sources.

In which case, you may need to use a userland utility. If it's IGMP/IPTV etc. give IGMP Proxy a shot. If it's mDNS (Avahi, Bonjour, Zeroconf), use mDNSd and enable reflection.

routing (mroute) one way or the other.

<https://github.com/openwrt/openwrt/blob/master/target/linux/ramips/mt7621/config-4.14>

2. It looks like smcroute is throwing this error on a call to socket_create inside of a function named m4route_enable.

<https://github.com/troglobit/smcroute/blob/dce98c0a164850e2361008c74a927e12fb1c1a67/src/mroute.c#L229>

I am the least programmy person in the world, so not really qualified to interpret what either of those things mean, or even if I'm understanding things correctly.
