For Creatives (looking for cracked Mac OS apps)

Question

I am a creative who recently switched my entire setup from Windows to Mac. One of the difficult things is finding productive apps in Zimbabwe. On Windows, it was usually easy to get software in Harare, but for Mac, I am finding it challenging. I know that I can download apps from the internet and I have done so many times. I can't afford paid versions for now. I am especially looking for cracked versions of Adobe products and CorelDRAW for M chips. Any recommendations solutions or links that actually work would be greatly appreciated.

I know there are free alternatives like gimp etc but I am already so much invested in Adobe.

Next, I know Zimbos don't care about security but trust me bro, being on a highly valued platform makes you a valuable target. Every cracked download will likely have more than one exploit built in. Learn how to spot suspicious traffic on your network (LuLu is an annoying but incredibly effective tool), google everything that asks for permissions and elevated privileges, learn to read whats going on in the Activity Monitor, double check any Terminal commands these cracked sites ask you to use, and finally, use leak database lookups like [haveibeenpwned](#) so you at least know where you've been exposed.

Now, for the stuff you want, torrent sites have already been suggested so here are 3 sites that have been useful for me.

PSA: New macOS malware might be circulating via cracked apps. Be careful what you're downloading!

What is the cheapest way to get adobe with the redaction feature? Do I have to buy the online monthly subscription, or is there a way to get it without monthly fees? and is there a military discount?
