Getting my book collection onto my e-reader

Hi, total tech noob here. I purchased a Tolino e-reader (essentially the same hardware and company as the Kobo e-reader) and I'm trying to figure out how to get ebooks/pdfs onto it. I've tried the web browser but it's laggy and always says it doesn't support the chosen file type (pdf and epub). I've looked into the cloud function but can't...

Being pirate is a family business y'all

My father took me to sail the seven seas before I even understand that you can spend money in exchange for goods and services. From Windows to movies we watched together. I learned how to download music to my mp3 player using P2P before I turned 10 (and sometimes accidentally downloaded porn lol) When my baby brother w...

hypocrisy.

Internet people :

Pirating video games and
doing art of copyrighted
characters is good !

Also Internet people :

Using free and easily
accessible softwares to make
art with artificial intelligence is
bad !

How often does kemono.su update old post?

Looking at importer section, I can only see that it checks for new post every 24h, no mention of what they do with older posts that gets updated.

Why can't distrusted hackers/groups just upload under a different name?

Sorry if this is a noob question, but as someone who's relatively new to the cracks scene, what's stopping a group or an individual with a reputation for uploading malware from just operating under a different alias? For example if person x gets put on the 'do not trust' list in the megathread, they could just create a new username? Is there an...

Why was Mullvad removed from the suggested VPNs from the mega thread?

Question

-  For torrenting: Set up a VPN network such as [AirVPN](#) or [ProtonVPN](#).

VPN enhances online privacy and security by encrypting the connection and masking the IP address, making it ideal for torrenting as it protects your identity, and allows access to restricted content.

Anyone else think Microsoft still benefits from people pirating Windows?

I was thinking about how common it is to pirate Windows, especially in countries where paying full price just isn't realistic. I think all the PCs/laptops I ever got had a pirated or at least "shared" version of Windows up until recently. And honestly, I can think of how Microsoft lowkey benefits from it. By letting people use Windows...
