## Adobe

### Question

Probably been asked by a million people, but I'm tired of being adobes little bitch. How relatively straight forward is setting up MonkRUs, and is it virus free?

Do not want to completely nuke my new laptop if possible.

I am a Piracy intern so quite the noob

Not too bad. For m0nkrus, just download it. For GenP (patching it yourself), just download the official creative cloud from adobe, and use GenP to activate it.

enjoying it.

I'm not experiencing any computer slow downs, no weird stuff happened to me after installation and Monkrus seems to be a reputable/trusted source. I'd recommend it.

If you had Adobe software installed previously, I recommend doing the full cleanup which you can find [here](#), guide #4.

One more thing, this is fully offline, in Photoshop you will not be able to use Neural Filters unless you log into an account (I did that and had no issues), for that you have to unblock it in the firewall and block it again after you downloaded the filters. But being logged into an account, even if it's fully offline, will slow down Photoshop, at least in my experience (i7 7700K, GTX 1070, 32GB DDR4, SSD installation). I logged out of my dummy Adobe account since I don't really use Neural Filters and my Photoshop boots a lot faster.

Edit: Fixed Link

So far nothing bad happened to two of my computers. No virus. I got Photoshop from MonkRUs . As long as you follow GenP's instructions and download from his website, it's fine.

That's good enough for me, I think it looks like one of the easier to pirate items out there though definitely

So happens I just set up Monk's photoshop 2025 release on a VM to see if any funny business is going on. No unexplained processes or network connections that I could see. Seems all it really does is block a bunch of adobe IPs.

You have a high chance of getting the "unlicensed app" and a 10-day countdown or glitches when you use cracked Adobe apps.

If you want to avoid the hassle, my friends and I have switched to a genuine Adobe All Apps plan for just \$15 a month with Firefly AI, it comes with Cloud and Multi-device login. I know the deal sounds unbelievable, but you can get it from Real\_Design\_King on Telegram. Just send them a message and request a free trial.
