Thanks GenP !!

Hello, I just wanted to thank you for allowing me to earn money with photoshop, while being a student. I can't necessarily afford a subscription. So thank you! And I wanted to know if you had a donation system to support you? Have a nice day

Appreciation

I can't download Adobe Animate with GenP method

I have the latest version of CC and GenP,i worked GenP as administrator,i patched the CC,even though i can see the install button it doesnt let me install and says "This Installer is broken.First uninstall this app,then install the latest version CC on your desktop"

GenP Not Working

Pretty sure this is an unlicensed issue as there are no traces of AGS anywhere. I looked at the troubleshooting guide, but nothing seems to work except the Outbound method, and that's fine ig. But what I want to know is if there's another fix? I kinda need the internet connection part. I tried manually changing the hosts file to the most recent and checked that it's a file and set up the auto hosts checker, but still getting the pop-up. The pop-up blocker button doesn't work either. This only seems to be affecting...

I can't fix the popup GenP

[I've tried everything, I did it as the help says, but I can't get rid of that popup and it won't let me use Illustrator, with Photoshop it's fixed, but with Illustrator nothing.](#)

GenP Photoshop Crash (26.5)

I'm using the latest GenP (3.5.0) and tried patching both the latest Adobe Photoshop (26.5) and an older version (26.3). However, after patching the Photoshop executable, the program crashes as soon as the window appears, it just closes without any error message... How can I fix this? Is there an easy solution?

Tried EVERYTHING - GenP

So I've been getting the common unlicensed pop up for the past few days. My Photoshop was working completely fine before that. I tried everything from the troubleshoot section and I haven't missed any steps, I know it coz I've been trying all of it for the past few days. I am on the latest version of Genp and also on the compatible version of Photoshop. Please don't say that I maybe have missed some steps as I literally tried changing host files, creating outbound and inbound rules and even reversing those. Th...

GenP Premiere Pro keeps closing randomly without any crash report to go with it

I made a few changes to my workflow recently, like upgrading my old Nvidia GPU for an AMD GPU, switching from Monkrus to GenP, recording in CQP bitrate instead of CBR on OBS, but Premiere Pro just randomly started to close by itself without any warning, and attempts to find a crash report file haven't really been fruitful. It never did this before, I'm just wondering if anyone has had a similar issue on GenP so I can cross it out as a possibility without having to go through the headache of reinstalling everything.

Monkrus Wiki Link Update?

Hey I'm getting a popup - so in attempts to troubleshoot my monkrus installed program I'm checking links but none are working. I know threads here aren't very open for discussion, I just don't know where to reliably find monkrus files. I'm more than happy to switch to the genp method if there are currently no active monkrus links, just wanted confirmation first. Edit- I see I won't get an answer or help, but I'll just let others know the site linked in wiki doesn't seem to play well with firefox. (and yesterday when I mad...

🔒 ...

GenP Illustrator/Photoshop

When I launch illustrator and photoshop I try to access my creative cloud files, but it says that the creative cloud is unable to sync. I want to access some files on there as I use these programs in school and have some work saved there. Is there a solution to this, or does creative cloud not work because of GenP?

Fully greyed out Photoshop 26.3 - GenP

Followed the guide step by step, as many times before and with the rest of the apps; no problems with them. Blocked Photoshop.exe with firewall (in and out) + Hostsman with Adobe is dumb.

New file button is greyed out, and Edit is all greyed out, too (no Preferences and all stuff)....
